

# AGRIBUSINESS

## Legal Expertise for Agribusiness: Comprehensive Solutions for an Evolving Sector

Due to its complexity, agribusiness requires multidisciplinary and specialized legal support. We bring together qualified lawyers to meet all of the sector's needs, covering land issues, operating contracts, financial transactions, rural and credit insurance, corporate law, mergers and acquisitions, agro-industrial projects, environmental (including climate change), MAPA regulatory law, international trade, labor, litigation, and estate and tax planning.

Our long-standing relationships with key agribusiness players have provided us with extensive knowledge of the sector's specificities. We serve a variety of clients, including producers of agricultural commodities, machinery, biofuels, agrochemical companies, financial institutions, startups, and agritechs. We are leaders in agribusiness financing, especially in securitizations such as CRAs (the main source of financing for these activities), M&A transactions, and commercial and administrative disputes.

Our expertise resulted in our participation in the drafting and negotiation of the New Agribusiness Law with the Ministry of Economy, Ministry of Agriculture, Central Bank of Brazil, and industry associations. We also advise clients on decarbonization issues, actively participating in the Brazilian Business Council for Sustainable Development (CEBDS), where we discuss carbon market regulation in Brazil.

## EXPERIENCE

- Extensive experience in the legal structuring of all types of agricultural or agro-industrial activities, encompassing the multidisciplinary legal issues that such projects may require.
- In-depth knowledge of traditional sectors, such as the financial and securities markets, in structured transactions involving agribusiness receivables, as well as specialized expertise in cutting-edge operations with investments in agritech and the use of high technology in agriculture, livestock, and bioenergy generation, in addition to partnerships and rural leases.
- Broad expertise in land matters: working on and developing solid structures for the acquisition and exploitation of rural land, meeting all regulatory and legal requirements.
- Proven track record in transactions that require the approval of major regulatory agencies and superintendencies.
- Comprehensive background in labor litigation and consulting, with emphasis on advising our clients on administrative and judicial proceedings instituted by the Labor Prosecutor's Office; A leading benchmark for compliance in agricultural matters, with preventive and corrective work to mitigate illegal practices in the field.
- Expertise in environmental issues, both in advisory and litigation matters, implementing operations involving assets located within the Legal Amazon.
- High capacity to handle issues related to legal reserves, restoration of degraded areas, reforestation, and waste treatment in accordance with the most stringent compliance and social responsibility parameters.
- The only partner law firm of AgTech Garage, an agribusiness innovation hub in the interior of São Paulo, which brings together leading companies in their segments to facilitate and accelerate the development of technological solutions for the sector.
