As China's presence in the global economy continues to expand, trade relations between Brazil and China have become increasingly important. TozziniFreire's China desk is comprised of capable professionals who specialize in assisting Chinese and Brazilian companies with their investments and businesses in both countries.

The China desk has extensive experience securing investments and deals in Brazil on behalf of major Chinese companies and financial institutions. In addition, the practice has represented numerous Brazilian companies seeking to invest in China.

Our professionals are regularly invited to speak on an array of China-related businesses and legal issues at a broad range of companies, various Brazilian government agencies, and the country's top business schools.

Foreign Desks

To help clients respond faster and more effectively to the increasing business opportunities between Brazil and other key existing trade partners and specific fast-growing economies, our firm pioneered the creation of foreign desks in Latin America, composed of professionals dedicated to these major trade and investment destinations. Starting with our Asian initiative (comprising our China, Korea and Japan desks) and fast developing towards other markets (German-speaking countries and Latin America), these unique knowledge centers are staffed with professionals familiar with the culture, legal and business practices of each region, and who are charged with keeping up-to-date with bilateral trade relations developments between Brazil and those countries.
