Our Timberland Investment team provides advice on the full range of issues related to timber rights and forest projects. The group regularly assists clients in timber sale and purchase contracts, supply contracts, leases, rural partnerships, structuring of all types of collaterals, including mortgages, fiduciary bonds, pledges and fiduciary assignments, among others.

Our professionals bring experience in all manner of real estate financing transactions, including those backed by real estate and agrarian assets, securitization of real estate and agribusiness receivables, and establishment of real estate-related investment funds and, more recently, FIAGROs (Investment Fund in Agro-Industrial Production Chains). The firm spearheaded the creation of innovative structures encompassing operations in this industry.

Jointly with other TozziniFreire's groups, the Timberland Investment sector group also actively advises on mergers and acquisitions, privatizations, and concessions of public services.
