The significantly heightened foreign investment in Brazil in recent years has made Corporate Law and Foreign Investment one of the most active practice groups in the firm and one of our main fields of specialization.

We have extensive experience advising investors on various mechanisms to establish or increase their domestic market presence, and how best to take advantage of the dynamic growth and liberalization of the Brazilian economy and regional market integration.

Our wide scope of services includes comprehensive advice to foreign investors on structuring and implementing multidisciplinary and multi-jurisdictional transactions. We also advise on investments; compliance; structuring and implementing IPOs, joint ventures, and mergers and acquisitions; investment alternatives, structuring of financing transactions; and negotiations with venture capitalists and financial regulatory bodies.
