

TECHNOLOGY & INNOVATION

Strategic legal solutions for a world driven by technology, data, and innovation

Our Technology and Innovation practice combines legal excellence with a vision for the future. We work strategically and in an integrated manner on complex issues related to technology, data, and new business models, offering comprehensive advice in consulting, transactions, and legal and administrative disputes.

Our multidisciplinary team brings together experts in various areas of law — such as corporate, intellectual property, labor, tax, data protection, litigation, and M&A — enabling a collaborative and innovative approach aligned with the needs of companies operating at the forefront of digital transformation.

Since 2016, we have stood out as the first full-service Brazilian law firm to implement a structured innovation program. Since then, we've developed projects that integrate legal design, data intelligence, and artificial intelligence governance. This pioneering work has been recognized nationally and internationally through awards and rankings that recognize our work in innovation, technology, and digital transformation in the legal sector.

Our purpose is clear: to transform complex legal challenges into opportunities for sustainable and innovative growth for our client
